

# VintageView

## WINE STORAGE SYSTEM

VintageView racks are designed so that you can see and enjoy the many attractive labels in your collection making bottle recognition fast and easy.

VintageView racks are designed to hold your bottle on the side at the perfect angle to preserve your wine. Smaller contact areas on the bottle allow for more even airflow, thus helping to preserve the wine.

VintageView racks can be installed to drywall that is at least one half-inch thick with appropriate fasteners. You can also attach VintageView to most wall surfaces including plywood, concrete, masonry (brick, stucco, stone), tile and plaster.

### FREESTANDING DISPLAYS

Freestanding displays are designed for retail and residential use and don't require mounting to your walls. These stylish metal units can easily be placed in the middle of a retail store or your favorite room in your house.

Prices starting at approx. \$66.00

*"A lot of racks are either overly complicated or too obtrusive...with these, you see only the bottles and when you light a wall of wine bottles from above, it's just gorgeous...they're as easy to install as shelving."*
